

Electrostatic Backpack Sprayer

STOP the spread of COVID-19

Works with any water-base liquid disinfectant

Cordless operation of up to 4 hours on a single charge

Replaceable rechargeable battery

360 degrees electrostatic wrap-around coverage

Saves labour & disinfectant costs

The Electrostatic Disinfection Backpack Sprayer is specifically designed to respond to the growing demand for highly effective disinfection & sanitation. It is best in-class for performance, capacity, quality and ease of use. This highly effective system can successfully help to kill and disinfect bacteria, viruses, and other pathogens. Our system is the most reliable and efficient solution to provide clean, safe areas wherever you need them; quickly and thoroughly.

Backpack Electrostatic Disinfection Spray

Thanks to the mobility and safety of this product, you can confidently take our sprayer wherever you need it. Due to its simple and straight-forward design, anyone can use this product to disinfect their facilities in the quickest and most effective way possible. The replaceable rechargeable battery can be charged remotely or in the sprayer unit. Charging a second battery in the charging station allows you to disinfect continuously without interruption, by simply exchanging the battery.

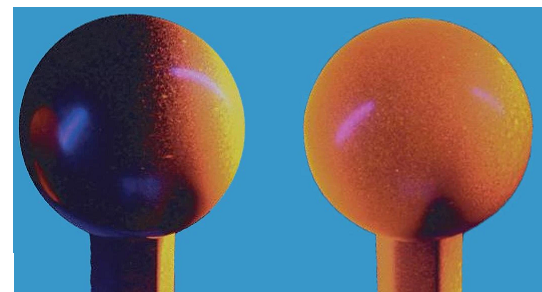

360 Degree Electrostatic Spray Wrap-around Coverage

Innovative Electrostatic Technology makes this system uniquely effective. The electrostatic charge ionizes the disinfection liquid, producing a magnetic effect. The charged disinfection liquid will completely cover the entire surface of the objects that are being sprayed, due to the opposite charges of the liquid and the objects. The spray offers full 360 degree wrap-around coverage, including undersides, backsides, and crevices.

Features and Benefits of our Electrostatic Disinfection Backpack Sprayer

- High quality electrostatic technology, built to last
- Easy-to-use design
- Up to 75% cost savings when compared to buying traditional disinfectants
- Up to 70% cost savings on labor
- Up to 8x faster than standard disinfection approaches
- Up to 12,000 sq. ft./hr. coverage and 40,000 sq. ft./hr. nominal coverage
- Generates 40 micron droplets
- 30KV electrostatic charge
- Replaceable rechargeable battery

Regular Sprayer vs. Electrostatic Sprayer

Cost Benefits of Electrostatic Disinfection
